

MEZE AUDIO

ARTA

EXPERIENCED RATHER THAN EXPLAINED

We've transformed cold metal into a **living, sculptural object** that feels like a work of art in motion. **ARTA's** design transcends conventional headphone aesthetics, blending futuristic, **bionic fluidity** with refined **Art Nouveau elegance**. The materials tell the same story: precision metals, carbon fiber, and leather, each one premium, each one purposeful.

ARTA delivers a rich, speaker-like presentation with lifelike detail, offering **the most immersive sonic experience we have ever created**. The soundstage expands naturally beyond the confines of the ear, projecting music around you with the organic spaciousness of an acoustically treated listening room. **Bass carries physical weight**, and instruments occupy real positions within a vivid, three-dimensional stage. The result is not just something you hear, it is something you inhabit.

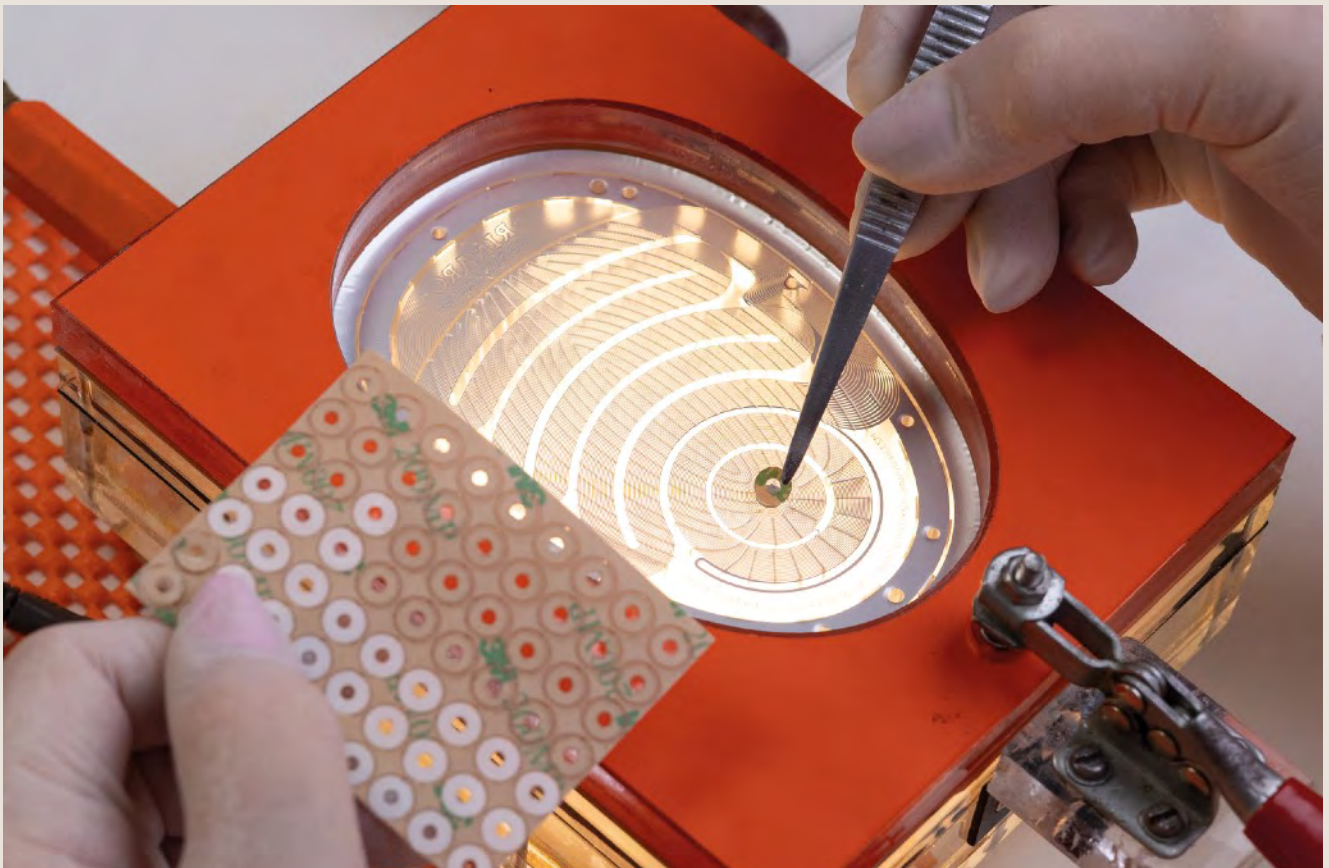

A FUNDAMENTALLY DIFFERENT PLANAR MAGNETIC

This level of technical performance is made possible through the use of an advanced new **High Impedance Isodynamic® Hybrid Array** driver developed by Rinaro Isodynamics: the **MZ5 HΩ**. It is the single highest impedance planar magnetic headphone transducer to date, delivering **exceptional linearity, stability, and signal purity**.

Rinaro Isodynamics has been at the forefront of planar magnetic technology for **over 40 years**. With a **state-of-the-art R&D** and manufacturing facility in Ukraine, Rinaro developed the **Isodynamic® Hybrid Array technology**, featured in the **Empyrean, Elite, LIRIC, POET, and ARTA headphones**.

Unlike conventional planar magnetic designs, which operate in a low-voltage, high-current mode, the **MZ5 HΩ's** high impedance design allows it to operate in a **high-voltage, low-current mode**. This translates into unprecedented electrical linearity across the audible spectrum. Moreover, less current means less heat and stress on the diaphragm, allowing ARTA to deliver **ultra-low distortion and dynamic compression at any listening volume**.

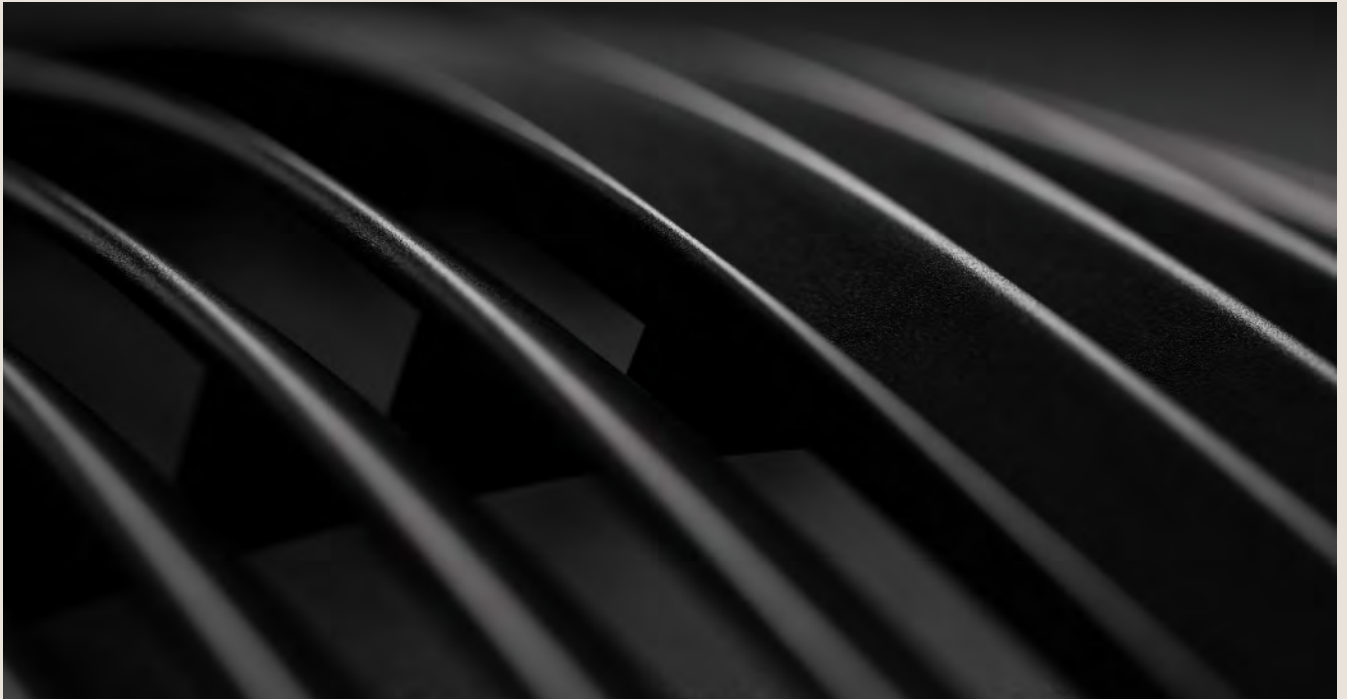

The planar magnetic trace is **2.5 times longer**, with a cross-sectional surface area **2.8 times smaller**, achieving a higher-density trace geometry that spreads electromagnetic drive more evenly across the membrane. This results in incredibly consistent on-axis and off-axis response without localised stress points, and the membrane moves as a unified whole, preserving transient integrity and keeping distortion vanishingly low even at demanding listening levels.

Synergy with sources – **ARTA's high-impedance design minimises sensitivity to amplifier output impedance variations**, ensuring the headphone's own acoustic character remains consistent regardless of amplification. Whether driven by tube or solid-state amplifiers, the tuning you hear is the tuning we designed, not an artifact of the electrical interface.

That said, **these headphones are a pure window into your entire signal chain**: the subtle warmth of a tube amplifier, the precision of a high-end solid-state design, all faithfully reflected. For the discerning listener, this is an invitation to explore, experiment, and make the sound truly their own.

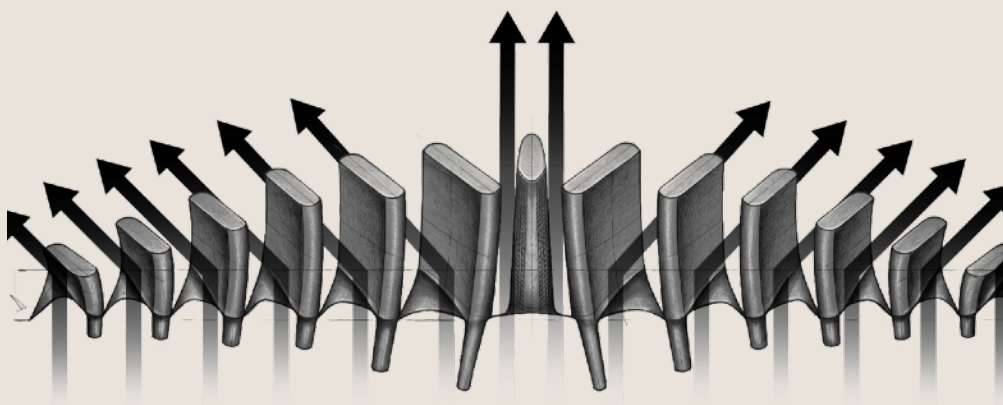

ANGLED ACOUSTIC BLADES

ARTA's open-back grille is composed of **angled acoustic blades** that help **preserve the headphones' sound quality** while providing physical protection to the driver.

The grille geometry is carefully designed to **work in concert with the Rinaro MZ5 HΩ driver's precision**, ensuring that enclosure acoustics do not constrain the transducer's performance.

Through their precision-engineered angled design, the blades diffuse rear-wave energy and **minimise internal reflections**, supporting cleaner transients and a more natural, open presentation.

ADJUST YOUR SOUND SEAMLESSLY

Experience the sound of ARTA in two distinct and refined flavours.

- **Duo Angled** - Crafted from a complementary blend of perforated lambskin leather and Alcantara®, and precisely angled for a richer, more impactful presentation.
- **Slim Alcantara** - Crafted from two types of Alcantara® with perforations on the inner chamber, designed for more neutrality, and a smoother, rounder upper region.

TWO HIGH-QUALITY CABLES INCLUDED

Two 2 m (6.6 ft) cables are included, each featuring silver-plated Linear Crystal Oxygen-Free Copper (LC-OFC) conductors arranged in a dual-strand configuration, with 161 individual conductors per strand. Insulated in SoftFlex PVC for enhanced comfort and flexibility, both cables incorporate CNC-anodized aluminum housings. One is terminated in a **6.3 mm single-ended jack**, the other in a **4-pin XLR balanced connector**, covering both single-ended and balanced listening.

THE SUMMIT OF AN ARTISTIC HEADPHONE CREATION

"ARTA came into existence from asking the same question over and over: what is there still between the listener and the music? The planar magnetic driver evolved slowly, deliberately, stripping away layers of compromise day after day. Through our collaboration with Rinaro Isodynamics, we've arrived at something that doesn't quite sound like headphones anymore, but simply music occupying real space." - Alex Grigoras, Acoustic Engineer

LAUNCH DATE: July 27, 2026

MSRP: \$/€6.000

BORN IN ROMANIA. BUILT TO LAST

This is not a promise we make lightly. **The ARTA has been designed to endure** - every component, from the earpads and headband to the drivers and earcups, **can be fully disassembled, serviced, or replaced.** Because an artistic headphone made to this standard should never become waste, but rather appreciate with the passing of time.

Time is our most valuable resource. Every headphone we make passes through countless iterations, refined until there is nothing left to improve. We engineer for generations, designing each one to be durable, fully serviceable, and timeless in its aesthetics. **We don't release our headphones on a deadline, but only when they have fully matured.**

Everything from acoustic tuning and mechanical design to quality control and assembly happens at our headquarters in **Baia Mare, Romania.** Our team brings both a trained ear for sonic detail and a meticulous eye for build precision, ensuring each pair of **ARTA headphones delivers the sound clarity, comfort, and ergonomic refinement Meze is known for.**

CORE AUDIENCE

Advanced to expert audiophiles who possess a deep understanding of audio technology and terminology. **They are research-driven**, discerning consumers who appreciate both acoustic innovation and industrial design. **Collectors, music lovers, technology enthusiasts and craftsmanship-lovers**, they seek authenticity over convenience and excellence over mass appeal. They do not simply buy audio equipment; they invest in a personal ritual centered on music appreciation.

Goals

- Achieve the most faithful, emotionally resonant reproduction of recorded music possible.
- Build a system (and collection) that reflects personal taste and expertise, not trends.
- Experience listening as a deliberate, almost meditative ritual.
- Be recognised within a community of fellow enthusiasts for discernment and knowledge.

Preferred budget range: €5.000 - €10.000

TECHNICAL SPECIFICATIONS

Driver Type	Rinaro High Impedance Isodynamic® Hybrid Array MZ5 HΩ	Sensitivity	98 dB SPL/mW at 1 kHz
Operating Principle	Open-back	Maximum SPL	>130 dB SPL
Ear Coupling	Circumaural	Total Harmonic Distortion (THD)	<0.05%
Frequency Range	3 Hz - 115 kHz	Headphone Weight	495 g
Impedance	225 Ω	Input Connector	Dual 4-pin mini-XLR

MZ5 HΩ DRIVER

Geometrical Shape	Ovoid	Active Area	4,650 mm ²
Size	102 mm x 73 mm	Diaphragm Weight	0.10 g
Driver Weight	84 g	Acoustic Mass	4.7 kg/m ⁴
Casing	Fiberglass reinforced polymer	Lower Frequency Limit	3 Hz
Diaphragm Type	Rinaro Parus ARTA® [MZ5 HΩ]	Upper Frequency Limit	115,000 Hz

Designed for desktop amplification, the ARTA headphones are optimized for high-voltage sources and perform best with capable desktop DAC/amp setups.

Parameter	Minimum	Recommended
Output power (225Ω)	200 mW	500 mW+
Voltage swing	±12V peak	±15–18V peak
Output impedance	<22Ω	<5Ω
Current output	>75 mA	>150 mA

COMPARISON

Feature	EMPYREAN II	ELITE	ARTA
MSRP	€/\$2.999	€/\$4.000	€/\$6.000
Sound Profile	Neutral sound signature, lively	Warm-neutral, organic, natural	Warm-neutral, smooth, rich
Build	Carbon fiber headband, leather headrest CNC Milled Aluminum frame	Lightweight carbon fiber, premium leather headband, one-piece CNC-machined aluminum frame	Precision metals, carbon fiber and premium leather, futuristic design, bionic fluidity with Art Nouveau elegance
Comfort	Excellent	Excellent	Excellent, optimised weight distribution with enhanced padded leather headband
Soundstage	Spacious and immersive	Slightly larger and more precise	Expanded soundstage, spaciousness of an acoustically treated room, three-dimensional stage
Genre Fit	All, but especially jazz and classical, rock, electronic and pop	Acoustic music, jazz, classical and vocal performances	All, but especially classical, acoustic, jazz, live recordings, vocal, progressive rock and metal, electronic atmospheric
Made In Romania
