

The Noble Audio FoKus Artemis is a flagship wireless over-ear headphone designed to bring reference-level sound, premium wireless performance, and modern everyday usability into one refined platform.

Built around a hybrid three-driver configuration and advanced wireless architecture, Artemis is intended to deliver a listening experience that is spacious, detailed, powerful, and distinctly high-end.

Created for listeners who want the scale and immersion of a full-size headphone without sacrificing convenience, Artemis combines dynamic impact, balanced armature precision, and planar speed in a design made for serious music listening at home, at work, and on the move. With Active Noise Cancellation, transparency features, app support, multipoint connectivity, USB audio, and long battery life, FoKus Artemis is being developed as a premium wireless headphone that balances audiophile ambition with practical daily use.

Key Features

Hybrid three-driver configuration

Dynamic driver + balanced armature + planar driver

Qualcomm QCC3095 platform

Bluetooth 5.4 connectivity

Audiobook Personal Sound

Active Noise Cancellation

Transparency mode

Noble FoKus app support

Multipoint connectivity

USB audio support

Fast charging

3.5mm wired audio support (Via included USB-C to 3.5mm Cable)

Up to 50+ hours playback target

Up to 35+ hours playback target with ANC

IP52 water resistance

Six-microphone design

MSRP

\$899 USD

Acoustics

Frequency 10 Hz - 40 kHz

Rated power 20 mW

Impedance 32 ohms

Sensitivity 99 dB +/- 3 dB at 1 kHz

Driver Dynamic driver + balanced armature + planar driver

Wireless

Chipset Qualcomm QCC3095

Bluetooth 5.4

Profiles A2DP / AVRCP / HFP / HSP / SPP

Codecs SBC / AAC / aptX / aptX-HD / LDAC

Range 10 m

Battery / App / Build

Battery 600 mAh Battery

Playback 35+ hr ANC on / 50+ hr ANC off

Charging < 1.5 hr

Full Self-Replaceable Battery

App EQ / OTA / multi-language support

FoKus ARTEMIS

HYBRID TRUE WIRELESS HEADPHONE
